CASE STUDY

PHARMALINK
STORAGE SOLUTION

EXPANDING AND STREAMLINING OPERATIONS TO SATISFY THE RAPID INCREASE IN DEMAND FOR PHARMACEUTICAL LOGISTICS IN THE COUNTRY

About PharmaLink Cyprus

Established in 2001, PharmaLink offers logistics expertise, storage and advanced information technology to streamline the supply chain procedures offering daily distribution to governmental warehouses, pharmacies and pharmaceutical wholesalers all over Cyprus.

OBJECTIVES

- Expand and maximise space utilisation
- Streamline small parts picking operations
- Increase pallet storage
- Integrate operations into the racking system

OUR SOLUTION

Within our long-term partnership with PharmaLink, we have provided many turn key intralogistics solutions to satisfy their diverse needs; As the sole distributor of the largest solutions provider in the industry, (SSI Schaefer), and with our extensive experience in the field of intralogistics, Spima supplied and commissioned a turnkey solution for the expansion and streamlining of their warehousing.

System configuration

The **pallet racks** were designed to the seismic coefficients of Cyprus using the standard Eurocode 8 norm and always in relations to the customer's needs / pallet storage capacities. It accommodates 1095 euro pallet locations in total.

In addition, as the customer's core business is involved in numerous daily picking operations, a large amount of bays were allocated to have **picking shelves by use of mesh decking panels** and partitions for better product sorting for the slow moving SKUs. The system has a total of 101 shelf levels.

For the **medium moving** items, special **inclined shelves** from the Schaefer R3000 range were installed in one of the rows with an assortment of multi-colored semi-open plastic containers from the diverse plastic container range of SSI Schaefer. Total bin locations for the inclined shelving is 518.

Lastly for the **fast movers**, a complete row was dedicated to multiple configurations of carton live storage (KDR) levels to complete the design. A total of 180 pick faces are present accommodating 948 boxes.

Benefits of using SSI Schaefer

By selecting Spima as their storage systems provider, PharmaLink had access to the most diverse storage solutions in the market by utilising products from SSI Schaefer. Not only did they achieve optimum design, they also achieved a multi-faceted and diverse storage solution.

"In the demanding pharmaceuticals environment we needed solutions that will reflect the highest standards we aim for. The combination of Schaefer racking systems and the Spima expertise and support have proved to be an excellent solution that met our expectations."

George Limbouris
Managing Director
